Shahed Al Amin Shihab

MERN Stack Developer

Passionate MERN Stack Developer looking for a challenging position that promotes growth, collaboration, and creativity in a stimulating atmosphere while allowing me to provide creative solutions.

Projects

Online Forum [Discuss Hub]

A dynamic social hub where users create, engage, and amplify content through posts, comments, likes, and shares, fostering an online community.

Required 10 days to complete.

Key Features

- Encourages active user connection and engagement through post-sharing and conversations in a lively social setting.
- Supports two roles: Users engage through posts, comments, likes, and shares; Admins oversee interactions and maintain platform integrity.
- Offers a premium membership option. Granting unlimited post-creation privileges and exclusive benefits.

Technologies: React, Express, Mongoose, Firebase, Material UI

Online Group Study [Educare]

An online platform enabling assignment creation, submission, grading, with Firebase authentication.

Required 7 days to complete.

Key Features

- Implement secure user registration/login using Firebase for enhanced security and streamlined management.
- Empower students to create detailed assignments, attach files, and submit seamlessly with timely deadline reminders.
- Provides extensive grading tools for students to access assignments, review feedback, and track academic progress seamlessly.

Technologies: React, NodeJs, Express, MongoDB, Firebase, Tailwind
